

LOKESHWARAN RAMU

Senior Salesforce Developer | Consultant | Solution Architect

Adelaide, Australia • +61 410 076 060 • lokeshramu16@gmail.com • lokeshwaranramu.com
LinkedIn / Salesforce Trailblazer • ✓ Australian Permanent Resident — No Sponsorship Required

PROFESSIONAL SUMMARY

Salesforce Solution Architect and consultant with 8+ years of enterprise delivery experience across financial services, retail, and technology sectors. Proven track record of leading end-to-end solution architecture and delivery across Service Cloud, Sales Cloud, Experience Cloud, and Agentforce — including complex integrations with Amazon Connect, Braze, Slack, and custom AI service agents. Delivered one of the earliest Agentforce production implementations in Australian fintech, architected enterprise security frameworks, loyalty platforms, and Master Data Management solutions, and led both org merges and de-mergers at scale. Deep expertise across marketing automation (Braze), omni-channel contact centre design (Amazon Connect), MDM, CI/CD, and REST API integration architecture. Brings a rare combination of hands-on technical execution and strategic architectural leadership — with an IAM/identity security background that informs every platform design decision. Former Developer Success Engineer at Salesforce. Holds 6 Salesforce certifications including Certified Data Architect and Platform Developer II. Australian Permanent Resident.

CORE COMPETENCIES

- ◆ Salesforce Solution Architecture
- ◆ Agentforce & AI Service Automation
- ◆ Apex, LWC, Aura, Visualforce
- ◆ REST/SOAP API Integration
- ◆ Service, Sales & Experience Cloud
- ◆ Braze Marketing Automation
- ◆ Amazon Connect & Omni-Channel
- ◆ Org Merge & De-merge Strategy
- ◆ MDM & Data Architecture
- ◆ Enterprise Security Architecture
- ◆ Identity & Access Management (IAM)
- ◆ CI/CD, DevOps & Platform Governance

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer | **OurMoneyMarket** | Adelaide, SA

August 2025 – Present

- Architected and delivered the complete Salesforce Service Cloud implementation — owning end-to-end solution design across case management, automation, and customer service operations for a regulated fintech lender.
- Pioneered one of the earliest Agentforce production integrations in Australian fintech — architecting and implementing an AI-driven service agent connected to a custom customer portal, enabling real-time responsiveness for loan applicants at scale.
- Architected and implemented an employee-facing Agentforce service agent — extending AI-driven service automation to internal operations and significantly reducing manual case handling overhead.
- Designed and delivered a Braze integration with Salesforce — architecting the full customer engagement data flow to enable personalised, real-time communications across the lending platform.
- Led enterprise security architecture for the organisation's Salesforce platform — identifying vulnerabilities, designing a comprehensive security model to remediate breach risk, and overseeing end-to-end implementation across all integrated systems.
- Designed and built complex REST API integrations with external lending systems via middleware and webhooks, ensuring secure, reliable, and auditable data flows across the platform.
- Established CI/CD pipelines and automated testing frameworks, materially reducing deployment risk and improving release velocity across the Salesforce org.
- Led platform governance — owning technical documentation, sandbox management, and enterprise design pattern adherence to ensure long-term scalability, data integrity, and regulatory compliance.

Senior Salesforce Developer | **Country Road Group** | Melbourne, VIC

February 2023 – May 2025

- Played a lead technical role in the successful de-merging of Country Road Group's Salesforce orgs — a high-stakes, complex initiative spanning cross-functional teams, data integrity assurance, custom solution development, and end-user training delivery.
- Architected and delivered the end-to-end Salesforce Service Cloud implementation — integrating Amazon Connect for telephony and a messaging platform to enable omni-channel customer service at enterprise scale.

- Architected and implemented the organisation's loyalty platform on Salesforce — designing the data model, integration layer, and automation framework to power Country Road Group's customer loyalty programme across retail brands.
- Architected and implemented the Braze marketing solution integrated with Salesforce — enabling data-driven, personalised customer engagement across the group's retail customer base.
- Designed and delivered the Master Data Management (MDM) architecture for Salesforce — establishing a single source of truth for customer data across multiple brands and systems within the group.
- Served as internal Salesforce consultant to business unit stakeholders — translating competing requirements into prioritised delivery backlogs, defining timelines, and providing executive-level progress visibility.
- Collaborated with external Salesforce partners and vendors to implement integrations and platform enhancements, maintaining alignment with enterprise architecture principles.

Salesforce Developer | **Webcentral Group** | Melbourne, VIC

December 2021 – February 2023

- Led the technical execution of a complex org merge — consolidating Sales Cloud and Service Cloud Salesforce instances across cross-functional teams, with full accountability for custom solution development, data integrity validation, and user adoption.
- Architected and delivered the complete Salesforce Service Cloud implementation — integrating Amazon Connect for telephony, Slack for internal collaboration, and an AI-powered chatbot agent to enable intelligent, omni-channel customer service.
- Designed and implemented custom Salesforce solutions including automated workflows, Apex customisations, Visualforce pages, custom objects, and SOQL-driven logic aligned to enterprise business requirements.
- Acted as trusted technical advisor to customers — providing strategic recommendations to streamline processes, enhance productivity, and scale Salesforce operations using platform best practices.
- Delivered comprehensive technical support across Sales Cloud, Service Cloud, and Community Cloud — resolving production defects, implementing enhancements, and improving system performance and UX.

Developer Success Engineer | **Salesforce** | Hyderabad, India

October 2020 – November 2021

- Worked within Salesforce's product organisation — developing Apex customisations, workflows, Visualforce pages, and SOQL queries to address complex enterprise customer requirements across Sales, Service, and Community Cloud.
- Provided expert-level technical troubleshooting and end-user support to Salesforce's enterprise customer base, resolving platform defects and implementing targeted enhancements.
- Consulted directly with enterprise customers to evaluate their platform usage and deliver actionable recommendations to improve process efficiency, scalability, and adoption.

Software Engineer — Identity & Access Management | **Issquared Inc** | Hyderabad, India

November 2017 – September 2020

- Built IAM provisioning solutions using IBM Security Identity Manager (ISIM), Tivoli Directory Integrator (TDI), and EIMS — automating user access lifecycle governance across enterprise systems.
- Integrated Salesforce.com with internal back-end systems via ISIM, building connectors using JavaScript, Java, Apex, and Visualforce to meet enterprise security and access requirements.
- Gathered and reported integration vulnerabilities and security findings, delivering improvement recommendations to engineering and security leadership teams.

SALESFORCE CERTIFICATIONS

Certified Platform Developer II | July 2025 | Credential ID: 6324070

Certified Data Architect | May 2022 | Credential ID: 2336275

Certified Service Cloud Consultant | February 2022 | Credential ID: 22980536

Certified Platform Developer I | May 2021 | Credential ID: 22166177

Certified App Builder | December 2020 | Credential ID: 21651650

Certified Administrator | October 2020 | Credential ID: 21524272

Java SE 6 Programmer — Oracle | October 2011

EDUCATION

Bachelor of Technology — Information Technology

Anna University, Chennai | 2013 – 2017

TECHNICAL SKILLS

Salesforce Platform: Apex, LWC, Aura, Visualforce, SOQL/SOSL, Flows, Triggers, REST/SOAP APIs, Agentforce, Salesforce CLI, SFDX

Clouds: Service Cloud, Sales Cloud, Experience Cloud (Community Cloud), Agentforce

Integrations: Amazon Connect, Braze, Slack, Middleware, Webhooks, Event-Driven Architecture

Architecture: Solution Architecture, Enterprise Security Architecture, MDM, Data Architecture, Org Merge/De-merge, Loyalty Platforms

Languages: Java, JavaScript, ReactJS

DevOps & Tooling: Git, CI/CD Pipelines, Automated Testing, Sandbox Management, HP ALM, JIRA

Security & IAM: IBM ISIM, Tivoli Directory Integrator (TDI), Identity & Access Management, Data Privacy & Compliance
