

Lokeshwaran Ramu

SALESFORCE DEVELOPER | CONSULTANT | ARCHITECT

Profile

Salesforce Developer, Solution Architect, and Consultant with 8+ years of experience designing, developing, and delivering enterprise solutions across financial services, retail, and technology sectors. Expertise in Salesforce technologies including LWC, Apex, Aura, triggers, flows, and process builders, with a proven track record of architecting seamless data flows, integrations, and end-to-end solutions across complex systems.

Proven track record of leading end-to-end solution architecture and delivery across Service Cloud, Sales Cloud, Experience Cloud, and Agentforce including complex integrations with Amazon Connect, Braze, Slack, and custom AI service agents. Delivered Agentforce in Australian fintech, architected enterprise security frameworks, loyalty platforms, and Master Data Management solutions, and led both org merges and de-mergers at scale. Deep expertise across marketing automation (Braze), omni-channel contact centre design (Amazon Connect), MDM, CI/CD, and REST API integration architecture.

Skilled in data migration, system integrations, and merging and de-merging Salesforce orgs, with a strong focus on ensuring data integrity, privacy, and compliance. Bringing a rare combination of hands-on technical execution and strategic architectural leadership with an IAM/identity security background that informs every platform design decision. Proficient in Salesforce best practices, Java, and various programming languages, with a demonstrated ability to troubleshoot system issues, enhance performance, and implement scalable solutions.

Adept at collaborating with cross-functional teams, external vendors, and business stakeholders to deliver customer-centric solutions that drive business growth. Known for effectively managing independent projects while contributing as a collaborative team player, with a passion for knowledge sharing and continuous improvement.

Work Experience

Salesforce Developer, OurMoneyMarket, Adelaide

AUGUST 2025 — PRESENT

- Architected and delivered the complete Salesforce Service Cloud implementation, owning end-to-end solution design across case management, automation, and customer service operations for a regulated fintech lender.
- Pioneered Agentforce production integrations, architecting and implementing an AI-driven service agent connected to a custom customer portal, enabling real-time responsiveness for loan applicants at scale.
- Architected and implemented the end-to-end sales process within Service Cloud by encompassing lead management with DocuSign integration for digital document execution, and a configurable approval management framework to govern broker and vendor onboarding workflows.
- Designed and delivered the lead-to-account conversion process for brokers and vendors by automating the qualification, approval, and account creation lifecycle to streamline partner onboarding and reduce manual processing overhead across the lending platform.
- Designed and delivered a Braze integration with Salesforce by architecting the full customer engagement data flow to enable personalised, real-time communications across the lending platform.
- Led enterprise security architecture for the organisation's Salesforce platform by identifying vulnerabilities, designing a comprehensive security model to remediate breach risk, and overseeing end-to-end implementation across all integrated systems.
- Designed and built complex REST API integrations with external lending systems via middleware and webhooks, ensuring secure, reliable, and auditable data flows across the platform.
- Established CI/CD pipelines and automated testing frameworks, materially reducing deployment risk and improving release velocity across the Salesforce org.

Skills

- Customer Data Management & Architecture
- CRM System Integration & Data Migration
- Data Privacy & Compliance
- Customer-Centric Solution Design
- Stakeholder Collaboration & Consulting
- Salesforce Development
- Salesforce Lightning & Administration
- Salesforce Service Cloud & Community Cloud
- Data Architecture & Data Integrity
- Identity & Access Management (IAM)
- Java Programming
- Continuous Integration & DevOps Practices
- Cross-Functional Team Leadership
- Agile Software Development & Project Management
- Problem Solving & Decision Making
- Effective Time Management & Prioritization
- Collaboration & Teamwork
- Adaptability in Dynamic Environments
- Strong Communication & Stakeholder Engagement
- Process Optimization & Productivity Improvement

- Led platform governance by owning technical documentation, sandbox management, and enterprise design pattern adherence to ensure long-term scalability, data integrity, and regulatory compliance.

Salesforce Developer, Country Road Group, Melbourne

FEBRUARY 2023 — MAY 2025

- Played a lead technical role in the successful de-merging of Country Road Group's Salesforce orgs, a high-stakes, complex initiative spanning cross-functional teams, data integrity assurance, custom solution development, and end-user training delivery.
- Architected and delivered the end-to-end Salesforce Service Cloud implementation by integrating Amazon Connect for telephony and a messaging platform to enable omni-channel customer service at enterprise scale.
- As part of the org de-merger, architected and delivered the Salesforce Sales Cloud implementation for David Jones - designing the end-to-end sales process to support David Jones's retail sales operations as a fully independent platform following separation from the Country Road Group org.
- Architected and implemented the organisation's loyalty platform on Salesforce by designing the data model, integration layer, and automation framework to power Country Road Group's customer loyalty programme across retail brands.
- Architected and implemented the Braze marketing solution integrated with Salesforce by enabling data-driven, personalised customer engagement across the group's retail customer base.
- Designed and delivered the Master Data Management (MDM) architecture for Salesforce by establishing a single source of truth for customer data across multiple brands and systems within the group.
- Served as internal Salesforce consultant to business unit stakeholders by translating competing requirements into prioritised delivery backlogs, defining timelines, and providing executive-level progress visibility.
- Collaborated with external Salesforce partners and vendors to implement integrations and platform enhancements, maintaining alignment with enterprise architecture principles.

Salesforce Developer, Webcentral Group, Melbourne

DECEMBER 2021 — FEBRUARY 2023

- Led the technical execution of a complex org merge by consolidating Sales Cloud and Service Cloud Salesforce instances across cross-functional teams, with full accountability for custom solution development, data integrity validation, and user adoption.
- Architected and delivered the Salesforce Sales Cloud implementation - including a Xero integration for automated invoice generation, enabling seamless financial data flow between the CRM and accounting platform, and implemented PQC (Price Quote and Contract) processes from the ground up to support end-to-end sales operations.
- Architected and delivered the complete Salesforce Service Cloud implementation with integrating Amazon Connect for telephony, Slack for internal collaboration, and an AI-powered chatbot agent to enable intelligent, omni-channel customer service.
- Designed and implemented custom Salesforce solutions including automated workflows, Apex customisations, Visualforce pages, custom objects, and SOQL-driven logic aligned to enterprise business requirements.
- Acted as trusted technical advisor to customer experience providing strategic recommendations to streamline processes, enhance productivity, and scale Salesforce operations using platform best practices.
- Delivered comprehensive technical support across Sales Cloud, Service Cloud, and Community Cloud, resolving production defects, implementing enhancements, and improving system performance and UX.

Developer Success Engineer, Salesforce, Hyderabad

OCTOBER 2020 — NOVEMBER 2021

- Worked productively with the product team to develop custom workflows, Visualforce pages, Apex customizations, custom objects & fields, formulas and SOQL queries by understanding requirements and business specifications.

Hobbies

Reading articles, Video Gaming,
Exercising, Travelling

Languages

English

Tamil

- Provided technical assistance and end-user troubleshooting for bug fixes, enhancements on Sales, service, and community cloud.
- Reviewed the development of test protocols for testing applications before user acceptance
- Collaborated with customers and provided recommendations to improve their processes and productivity to increase their scaling at a rapid pace using Salesforce best practices.

Software Engineer, Issquared Inc, Hyderabad

NOVEMBER 2017 — SEPTEMBER 2020

- I have written codes with the java team for provisioning access to the users using ISIM (IBM Security Identity Manager), TDI (Tivoli Directory Integrator), and EIMS.
- Collaborated with other engineering teams to integrate Salesforce.com and various other internal back-end systems with ISIM.
- Developed the appropriate connectors and web pages to meet business requirements using JavaScript, Java, Apex classes, and Visualforce in Salesforce.
- Performed unit testing and functional testing using HP ALM (Application Lifecycle Management).
- Gathered data on integration issues and vulnerabilities and reported all findings, including improvement recommendations.

Software Developer - Trainee, Auzmor, Chennai

JULY 2017 — OCTOBER 2017

- Worked in back-end connectivity using Vert.x, JWT, and Java in HRIS and HCM projects.
- Coordinated with front-end team for website development using ReactJS and Ant Design.
- Hosted the Application Tracking System website and back-end system in the AWS EC2 console.
- Tested and deployed the application for ease of use, collaborating on all stages of the SDLC from requirement gathering to production releases.

Education

Bachelor in information technology, Anna University, Chennai

AUGUST 2013 — APRIL 2017

Graduated B.Tech from Anna University, Chennai

Certifications

Salesforce Certified Platform Developer II, Salesforce

JULY 2025

Credential ID: 6324070

Salesforce Certified Data Architect, Salesforce

MAY 2022

Credential ID: 2336275

Salesforce Certified Service Cloud Consultant, Salesforce

FEBRUARY 2022

Credential ID: 22980536

Salesforce Certified Platform Developer 1, Salesforce

MAY 2021

Credential ID: 22166177

Salesforce Certified App Builder, Salesforce

DECEMBER 2020

Credential ID: 21651650

Salesforce Certified Administrator, Salesforce

OCTOBER 2020

Credential ID: 21524272

Java SE 6 Programmer, Oracle

OCTOBER 2011

Internships

Project Intern at Sans Pareil IT Services, Chennai

DECEMBER 2016 — MAY 2017

- As a java intern, I have developed health care software by gathering information from doctors, organizing the input, and analyzing the data for pattern matching combinations for the effective output.
- Established user interfaces using HTML and servlet for backend pattern matching using data analytics.

Courses

Advance Java Programming, NIIT | January 2011 — November 2011

C Programming, NIIT | January 2010 — December 2010

Object Oriented C++ Programming, NIIT | June 2010 — December 2010
